

# Varis for the public sector

**Varis connects buyers and trusted suppliers in an intuitive, one-stop purchasing platform that increases operational efficiency and savings.**

Finding and buying what you need from compliant suppliers should be easy, whether it's through your own agency contracts or through other public sector contracts ("piggyback contracts"). Yet many public sector procurement processes can involve paper, email, or outdated technology, making it time-consuming, complicated, and costly.

Varis is reimagining public sector procurement and collaboration through our purchasing platform that brings together your agency's suppliers with suppliers that have competed for and been awarded piggyback contracts by other public sector organizations.

By consolidating all suppliers into an easy to use, one stop shop for multiple purchasing categories, Varis saves you money and ensures compliance by increasing the amount of spending conducted through competitively awarded and approved contracts. Buyers also spend less time navigating complex procurement processes, including issuing costly and time-consuming requests for proposals (RFPs), which lowers administrative costs, helps improve regulatory compliance, and gives buyers more time to focus on mission delivery.

## Better control and visibility

In addition to lowering costs, Varis gives you better control and visibility over your spending to support overall transparency and accountability to taxpayers, auditors, and other key stakeholders. Digitization and automation not only increase efficiency in procurement and finance but also let you see your entire spend across departments and locations, regardless of purchase size, with the touch of a button. Varis allows you to meet your competition requirements and simplifies how you connect, contract, and transact—helping to keep your organization efficient and focused on its mission.

## Benefits

- / Improve procurement and finance efficiency, transparency, and decision making by digitizing and automating manual paper-based processes.
- / Streamline your sourcing process, facilitate collaboration and generate hard dollar savings from volume discount pricing offered through piggyback contracts that have already undergone the public sector RFP process.
- / Improve compliance through access to suppliers that meet the regulatory and policy requirements unique to public sector organizations.
- / Realize quick time to value by easily implementing Varis' intuitive purchasing platform in a matter of weeks with limited IT involvement.

## Consumer-like purchasing experience within your curated marketplace

Users log into Varis and enter a search term for what they need.

Shop top-quality business suppliers aligned to your policies with a single cart.

You can easily access and track approvals and POs in Varis.
